

When the ground fails,
we don't.

Installation and Product Info Guide

Paths & Trails

mudX prevents grassy paths, greenways, and high-traffic areas from turning into muddy, rutted messes.

mudX For Paths and Trails

Keeps routes firm and accessible.

- Grass
Optionally add more top soil and plant grass. Sand, pea/rice gravel can also be used.
- Top Layer/Dirt Fill
Fill with dirt and compact.
- mudX Grid System
Interlocking grid that stabilizes and reduces runoff.
- Compacted Soil
Stable ground layer that supports the entire system.

Stalls & Runouts

Create a cleaner, more stable footing surface around stalls and runouts while reducing mud, runoff, and daily maintenance.

mudX For Stalls & Runouts

Create a cleaner, safer environment for your livestock.

- Bedding Layer
Add bedding top-layer to create soft surface for livestock comfort.
- Stall Mats
Optional mat cushion layer that will make cleaning easier and prevent muck from getting into gravel.
- Top Layer/Gravel Fill
Fill with pea/rice gravel and compact.
- mudX Grid System
Interlocking grid that stabilizes and reduces runoff.
- Base Layer
Tamped 4" - 6" base layer of 3/4" clean stone.
- Compacted Soil
Stable ground layer that supports the entire system.

Driveways

Reinforce gravel driveways to reduce rutting, improve drainage, and keep gravel from washing away without the cost of asphalt or concrete.

mudX For Gravel Driveways

Minimize washouts and surface deterioration.

- Top Layer/Gravel Fill
Fill with pea/rice gravel and compact. Add optional layer of decorative gravel, sand or dirt.
- mudX Grid System
Interlocking grid that stabilizes and reduces runoff.
- Landscaping Fabric
Add a fabric barrier to disrupt plant growth.
- Base Layer
Tamped 8" layer of 3/4" clean stone for a solid foundation.
- Compacted Soil
Stable ground layer that supports the entire system.

Recreation

Transform problem ground into a stable, reliable surface for, campsites, trails, and outdoor living areas.

mudX For Recreation

Enjoy the outdoors with less mud and maintenance.

- Top Layer/Gravel Fill
Fill with pea/rice gravel and compact. Add optional layer of decorative gravel.
- mudX Grid System
Interlocking grid that stabilizes and reduces runoff.
- Landscaping Fabric
Add a fabric barrier to disrupt plant growth.
- Compacted Soil
Stable ground layer that supports the entire system.

Prep work area

Add & level base

Install mudX

Add fill material

Tamp and level

mudX can be used anywhere mud, runoff, or soft ground gets in the way. Its applications are limited only by the needs of your property, making it a practical option for both targeted problem areas and larger surface-stabilization projects. Wherever you need better footing, improved drainage, or a more reliable ground surface, mudX is designed to fit the job.
